Tools & Techniques

The strategies for the design and delivery of PLE are limited only by the imagination and resourcefulness of the PLE provider. This is far from an exhaustive list – but it should get your creative juices flowing!

Each tool has its advantages and limitations, and its use should be considered in the context of the needs identification and objectives, target group, adult learning principles and resources. Whether the activity is once-off, will be repeated with a number of groups or if it is ongoing may also influence the choice of tools and techniques
